

AJ Labs Syllabus

Cloud Collaboration Training

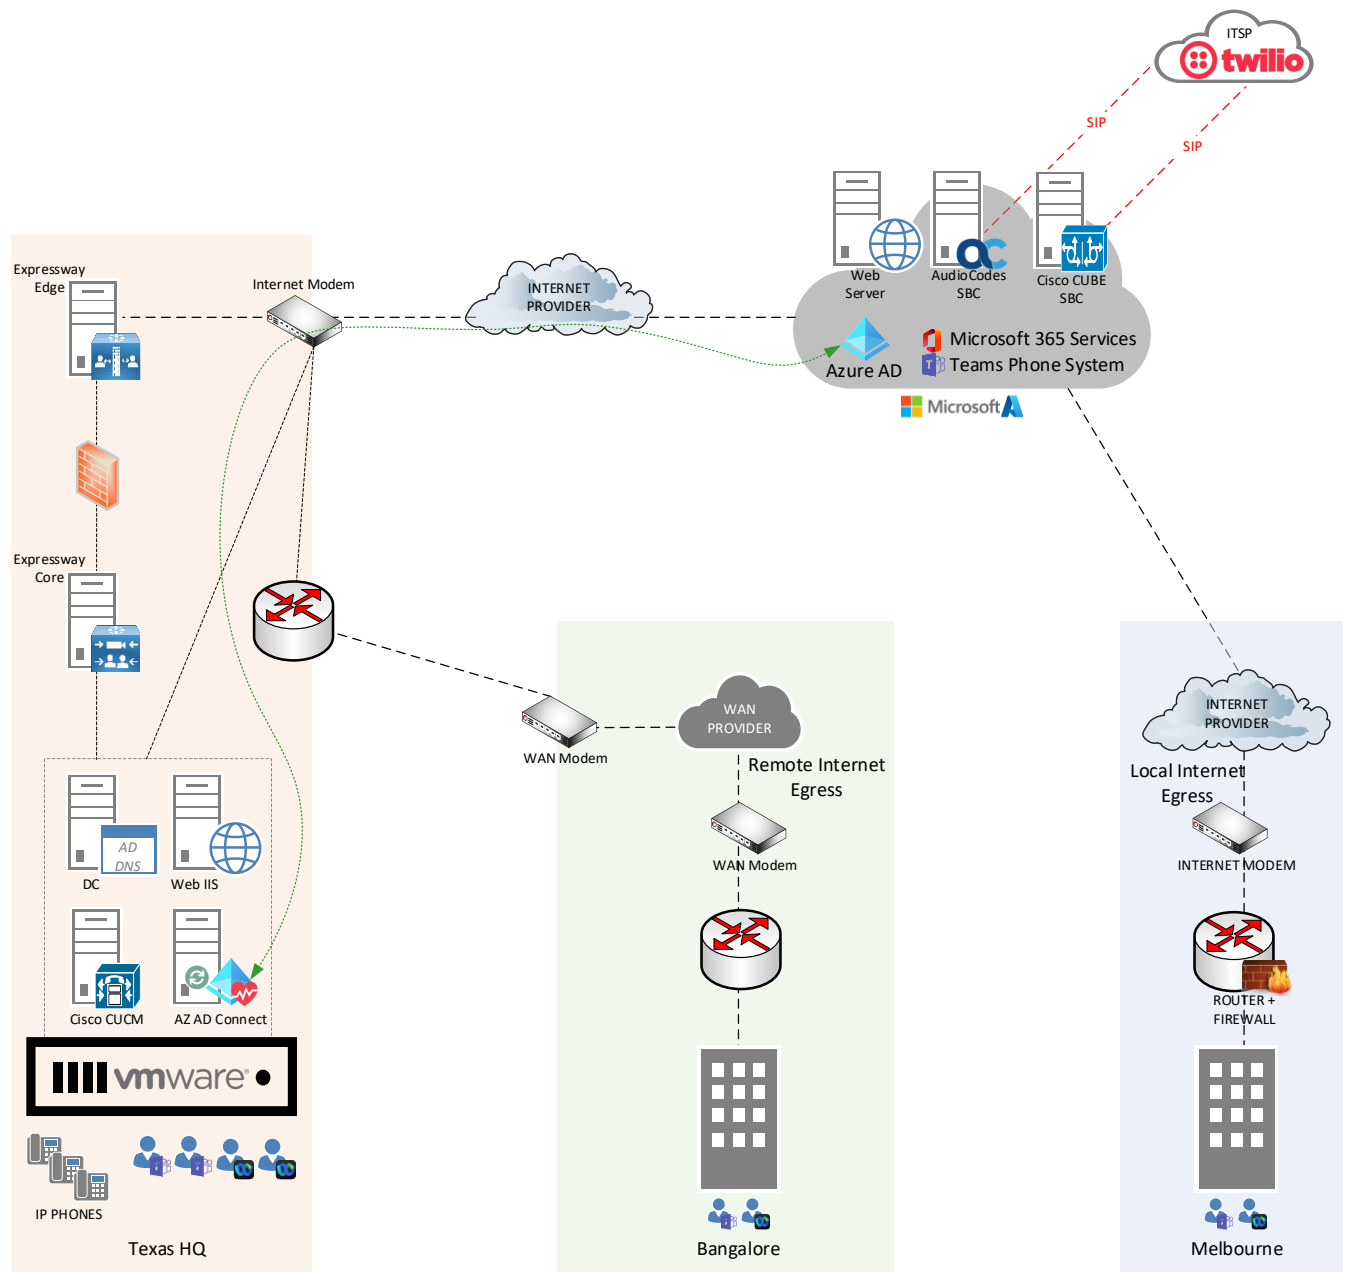

vmware Microsoft cisco audiocodes twilio A i

Training Details

- Online Recorded Class (33 Session, 85 hours in total)
- Remote real-time lab access
- Certification oriented (AZ900, AZ104, MS700, MS721, CLCEI 300-820)
- Other advanced study materials, eBook, Interview Questions, etc.
- Individual attention for learning, Post training community support

Contact: +91-79751119200

AJ Labs Cloud Collaboration Network Topology

Module 1 - vmware Datacenter, Windows, and Azure Public Cloud

1. Introduction to Networking, Virtualization and Cloud Computing
2. Structure on an Enterprise Server Infrastructure
3. Structure of Virtualized Enterprise Server Infrastructure
4. What is vmware ESXi?
5. [Lab] Getting Started with vmware ESXi
6. [Lab] Installing Windows Server 2019 in vmware ESXi
7. [Lab] Windows Server Post-installation Setup on vmware ESXi Platform
8. [Lab] Installing vmware Tools
9. Microsoft Traditional Active Directory (AD)
10. Windows Active Directory (AD)
11. Domain Name System (DNS)
12. [Lab] Configure Active Directory & DNS in Windows Server 2019
13. [Lab] Configure Reverse Lookup Zone
14. [Lab] Adding Primary Domain AJCOLLAB.COM in Active Directory as UPN Suffix
15. [Lab] Disable Windows Password Auto Expiry & Complexity Group Policy (For lab usage only)
16. [Lab] Create a User in AD
17. Real World Examples of Server Infrastructure
18. Deploying Web Server in Windows using IIS
19. Port forwarding and External Access to IIS Website
20. As a Service Offerings
21. Platform as a Service Demo
22. Infrastructure as a Service Demo
23. History of Microsoft
24. What is Microsoft Azure
25. History of Microsoft Azure
26. Azure Global Infrastructure
27. Azure Datacenter
28. Regions
29. Geography
30. Availability Zones (AZ)
31. Express Route
32. Azure global network
33. Understanding Cloud Collaboration Certifications
34. AJ Recommendation for Certifications
35. [Lab] Creating Free Trial Azure and 365 Account with 365 E5 Trial
36. [Lab] Getting Started with Administration via Azure Portal (portal.azure.com)
37. [Lab] User Administration with Azure Portal
38. [Lab] License Management from Azure Portal
39. [Lab] Getting Started with Administration via Microsoft 365 Portal (admin.microsoft.com)
40. [Lab] User Administration with Microsoft 365 Portal
41. [Lab] Create new User from Microsoft 365 Admin Portal
42. [Lab] License Management from Microsoft 365 Portal
43. [Lab] Managing Custom Domain from Microsoft 365 Admin Portal
44. Azure Subscription
45. [Lab] Create Azure Subscription 129
46. Azure Resource
47. Resource Group
48. [Lab] Create Resource Group
49. Azure Virtual Machine Services
50. Azure Virtual Machine Types and Sizes
51. [Lab] Deploying Windows VM in Azure
52. [Lab] Deleting Azure VM
53. Azure Virtual Network Service
54. Virtual Network Interface
55. [Lab] Creating Azure Virtual Network Service

56. Review the Virtual Network Service
57. [Lab] Deploy New Windows VM in Azure Virtual Network
58. Review the Azure Virtual Machine
59. [Lab] Accessing and Connecting to Azure VM
60. [Lab] Deleting Azure Virtual Machine
61. Network Security Group
62. [Lab] Creating Network Security Group at Subnet Level
63. [Lab] Add Inbound Rules in Network Security Group
64. Realtime Examples with Azure Virtual Machines
65. [Lab] Host Your Own HTML Website with Windows VM in Azure using Windows IIS
66. [Lab] Accessing IIS Sample Website with Private IP or localhost
67. [Lab] Change the default IIS Website to your own Custom Site
68. [Lab] Hosting AJ Labs Sample HTML Webpage on Azure Windows VM
69. [Lab] GoDaddy Domain Mapping to Azure VM Public IP (A Record)
70. [Lab] GoDaddy Domain Mapping to Azure VM Public DNS Name (CNAME)
71. [Lab] Host Your Own PHP Website in Azure Windows VM with Windows IIS & PHP
72. [Lab] Hosting AJ Labs Sample PHP Webpage on Azure Windows VM
73. [Lab] Enable IIS & Loading Custom PHP to Azure Windows VM Using PowerShell
74. Custom data or User Data and Custom Script Extension
75. User Data for Azure Virtual Machine
76. Custom Script Extension
77. [Lab] Enable IIS and Loading Custom PHP to Azure Windows VM Using Custom Script Extension
78. [Lab] Deploying CentOS Linux VM in Azure
79. [Lab] Host Your Sample PHP Website with CentOS Linux VM in Azure using HTTPD
80. [Lab] Host Your Own PHP Website with CentOS Linux VM in Azure using HTTPD
81. [Lab] WinSCP to Edit Linux Files via SFTP
82. [Lab] Loading Custom PHP Website to Azure CentOS Linux VM using Bash Script
83. [Lab] Loading Custom PHP Website to CentOS Linux using Custom Script Extension
84. [Lab] Loading Custom PHP Website to CentOS Linux VM using Custom Data Scripts
85. Azure Load Balancer
86. [Lab] Deploying Azure Load balancer and distributing website traffic
87. Azure NAT Gateway
88. [Lab] Deploying Azure Load balancer and distributing website traffic
89. Default Network Communications in Azure vNet
90. OS Disk, Temporary Disk and Data Disk
91. Azure Managed Disks
92. State of Azure Virtual Machine
93. Azure Resource Cost Analysis, Budget and Pricing
94. Virtual Machine Serial Console
95. Azure Storage Accounts
96. [Lab] Creating a Storage Account
97. [Lab] Uploading a File to Blob Storage
98. [Lab] Azure Storage Explorer Access to Individual Container
99. [Lab] Azure Storage Explorer Access to All Container inside a Subscription
100. Azure Identities and Governance
101. Azure Active Directory
102. [Lab] Reviewing Default Azure AD Directory Options
103. [Lab] Map Custom Domain in Azure AD
104. [Lab] Create Users in Azure AD and Login as New User
105. [Lab] Create a Global Administrator Account with AJCOLLAB Domain Name
106. [Lab] Getting a new Free Trial Azure Subscription on the new Account
107. [Lab] Access the Microsoft 365 Admin Portal
108. [Lab] Disable Multi-Factor Authentication Security by Default Options
109. [Lab] Disable Multi-Factor Authentication Per User Basis
110. Difference between Azure AD and On-Premise Windows AD
111. Role Based Access Control (RBAC)
112. [Lab] Creating User Groups and Adding Users to the Group

113. [Lab] Providing Reader Access to Resource Group for the new User Group
114. [Lab] Providing Owner Access to the New Subscription for the Default User
115. [Lab] Creating Custom Role
116. Azure AD Role
117. Azure AD Connect
118. Azure AD Connect Prerequisites
119. [Lab] Setting up Windows Server for Azure AD Connect – Joining Domain
120. [Lab] Create Sync User Group in On-Premise AD
121. [Lab] Create an OU for Group Writeback
122. [Lab] Installing Azure AD Connect
123. Accounts Created as part of AD Connect
124. AD Connect Sync Scheduler Status
125. [Lab] Azure AD Connect Filtering Based on Domain
126. [Lab] Metaverse Search
127. [Lab] Azure AD Connect Manual Sync Cycle
128. Delta Sync
129. Full Sync (Initial Sync)
130. [Lab] Synchronize on-prem AD Group to Azure AD
131. [Lab] Completely Disable Azure AD Sync
132. Important AD Connect PowerShell Commands
133. PowerShell Foundation
134. [Lab] Renaming folder Name with PowerShell
135. [Lab] Start / Stop Windows Service with PowerShell
136. [Lab] Installing MSOL Command sets in PowerShell
137. [Lab] Connecting PowerShell to Azure
138. [Lab] Installing & Connecting Exchange Online Command sets in PowerShell
139. [Lab] Installing & Connecting Teams Command sets in PowerShell
140. [Lab] Creating a User with PowerShell
141. Important PowerShell Commands

Module 2 – Microsoft 365, Teams Administration, Direct Routing, SBCs

142. Assign Microsoft 365 Licenses to End Users (Enable Teams Feature)
143. [Lab] Assign Microsoft 365 Licenses to End Users from Admin Portal
144. [Lab] Assign Microsoft 365 Licenses to End Users from Admin Portal Active User Page
145. [Lab] Assign Microsoft 365 Licenses to End Users from Azure Active Directory Portal
146. [Lab] Group Based License Assignment
147. [Lab] Access office Applications and Teams as End User
148. Getting Started with Teams Administration
149. Understanding Groups for Teams Administration
150. [Lab] Creating Microsoft 365 Group with Teams from Microsoft Admin Center
151. [Lab] Creating Microsoft 365 Group from Azure Active Directory
152. [Lab] Enable Teams to an Existing Microsoft 365 Group
153. [Lab] Creating Teams from Teams Admin Center
154. [Lab] End User Creating Teams from Teams Application
155. [Lab] Creating Teams and Adding Users Using PowerShell
156. [Lab] Group or Teams Assignment from User Page
157. Managing Users in a Team
158. [Lab] Team Member Requesting to Add another Member to the Owner
159. [Lab] Team Owner Adds Another Member
160. [Lab] Add Additional Owner to the Team
161. [Lab] Managing Teams Settings from Teams Admin Portal
162. [Lab] Managing Users in Teams Admin Center
163. [Lab] Dynamic User Group Membership
164. Governance and Life Cycle Management
165. [Lab] Naming policy for Microsoft 365 Groups
166. [Lab] Managing Group Expiration Policy
167. [Lab] Archiving and Restoring a Team
168. [Lab] Deleting and Un-Deleting
169. Managing Guest Access
170. [Lab] Configuring Guest Access
171. [Lab] Configure Guest User
172. [Lab] Remote Guest User
173. Managing Chat and Collaboration Experience
174. Global (Org-wide default) Messaging Policy
175. Custom Messaging Policy
176. View and Change Policy for individual User
177. Test Custom Messaging Policy
178. External Access
179. Standard Channel
180. Public Channel in Teams
181. Private Channel in Teams
182. Manage Channels from Team Admin Center
183. Global (Org-wide default) Teams Policy
184. Custom Teams Policy
185. Test Custom Teams Policy
186. Channel Email Integration
187. External Sharing from Teams
188. File Upload in Teams
189. File Management in Teams
190. File Sharing Link from Teams
191. External Cloud File Storage Options in File Tab
192. Enable or Disable External Clouds File Storage Options
193. Adding Google Drive to Cloud File Storage
194. Managing Meeting Experience
195. Configuring Meeting Settings
196. Meeting Policies

197. General
198. Audio & Video:
199. Recording & Transcription:
200. Content Sharing:
201. Participants & Guests:
202. Custom Meeting Policies
203. Teams Federation and External Access
204. Managing Security and Compliance
205. Microsoft Teams Admin Roles from Microsoft 365 Admin Portal
206. Microsoft Teams Admin Roles from Azure Active Directory Portal
207. Teams Phone System for PSTN
208. Microsoft Teams PSTN Connectivity Options
209. Phone System Licensing
210. Calling Plan - Managing Microsoft Teams Phone Numbers
211. [Lab] Buy a Calling Plan from Microsoft 365 Admin Center
212. [Lab] Assigning and Verifying Phone System License along with Calling Plan
213. Calling Plan Teams Phone Number Types
214. [Lab] Acquiring Phone Numbers from Microsoft (Calling Plan)
215. [Lab] Assigning Phone Numbers to User (Calling Plan)
216. Network Topology
217. [Lab] Configuring Network Topology
218. Configuring Emergency Calling
219. [Lab] Manage Emergency Address
220. [Lab] Manage Location Information Service (LIS) database
221. [Lab] Create Emergency Calling Policy (Calling Plan, Operator Connect)
222. Phone System Policies
223. Calling Policy
224. Call Hold Policy (Music on Hold)
225. Call Park Policy
226. Caller ID Policy
227. Policy Packages
228. Inbound Call Blocking at Tenant Level
229. Inbound Call Blocking Individual User Level
230. Outbound Call Blocking
231. IVR Solutions with Call Queue
232. Call Queues
233. Call Queue Routing Methods
234. Resource Accounts
235. Auto Attendants
236. [Lab] Design a Complete Voice IVR Contact Center Application in Microsoft Teams
237. [Lab] Acquire the Service Phone Number
238. [Lab] Creating Resource Accounts
239. [Lab] Assign 'Microsoft Teams Phone Resource Account licenses
240. [Lab] Assign Number to Auto Attendant Resource Account
241. [Lab] Creating Call Queues
242. [Lab] Creating Auto Attendant
243. Audio Conferencing in Meeting
244. [Lab] Configure Licenses for the Audio Conferencing
245. [Lab] Configure Audio Conferencing
246. [Lab] User Settings for Audio Conferencing
247. [Lab] Audio Conferencing Option in a Sample Meeting
248. Optimize Network Performance for Teams
249. Network Readiness
250. Network Performance
251. Network Validation Tools
252. Network Planner
253. Network Connectivity Test Tool

- 254. Network Assessment Tool
- 255. VPN Considerations for Teams
- 256. Dial Plan
- 257. Service Country Scoped Dial Plan:
- 258. Tenant Scoped Dial Plan
- 259. [Lab] Creating Custom Tenant Dial Plan
- 260. Inbound Call Handling Per User Features
- 261. Call Delegation
- 262. Simultaneous Ringing (Sim Ring)
- 263. Call Forwarding
- 264. Group Call Pickup
- 265. Inbound Call Handling Configurations from Teams Admin Center
- 266. [Lab] Teams Cloud Voicemail Configurations
- 267. Teams Client Devices
- 268. Microsoft Teams Room (MTR) Components
- 269. Microsoft Teams Rooms License
- 270. Microsoft Teams Room (MTR) Provisioning
- 271. Microsoft Teams Phones
- 272. Microsoft Teams Phones Provisioning
- 273. Configuration Profile
- 274. Basic Monitoring and Troubleshooting Teams
- 275. Azure AD Login Issues
- 276. PowerShell User Account Validation
- 277. Support Logs from Teams Desktop Client
- 278. Teams Media Logs
- 279. Teams Desktop Logs
- 280. Browser Logs
- 281. Microsoft Call Quality Dashboard (CQD)
- 282. Call Quality Report for individual users
- 283. Teams Usage Reports
- 284. Transport Relay
- 285. Direct Routing
- 286. Plan Design Direct Routing Call Flows
- 287. Microsoft Certified SBCs
- 288. License Required for Direct Routing
- 289. Steps required to deploy direct routing
- 290. Configuring Direct Routing SBC
- 291. [Lab] Add SBC in Microsoft Teams
- 292. [Lab] Voice Routes and PSTN Usage Record
- 293. [Lab] Voice Routing Policy
- 294. [Lab] Enable User for Direct Routing
- 295. [Lab] Add Public SRV Records and CNAMEs for Teams Phone System
- 296. [Lab] Implement AudioCodes SBC with Microsoft Teams
- 297. [Lab] Configure Network Security Group of SBC
- 298. Access the Web Interface of AudioCodes SBC
- 299. [Lab] Map Public DNS name to Public IP Address of SBC
- 300. [Lab] Configure the Public SSL Certificate for SBC
- 301. [Lab] Configure AudioCodes SBC for Direct Routing
- 302. [Lab] SIP PSTN Side Integrations

Module 3 – Webex Administration, Webex Calling

- 303. History of Cisco Webex
- 304. Webex Teams Client
- 305. Spaces
- 306. Teams
- 307. Meetings
- 308. WebEx Control Hub Overview
- 309. Control Hub Deployment Life Cycle
- 310. [Lab] Local User Management in Webex Control Hub
- 311. [Lab] Domain Verification Manual
- 312. [Lab] Domain Verification with Azure AD
- 313. Claim the Domain
- 314. [Lab] Cisco Directory Connector
- 315. [Lab] Troubleshooting Directory Connector
- 316. [Lab] Auto Synchronize Azure Active Directory users into Control Hub
- 317. [Lab] Provision on Demand Synchronize Azure Active Directory users into Control Hub
- 318. Webex Teams SSO
- 319. Process of SSO Login
- 320. Metadata File
- 321. [Lab] Webex SSO with Azure AD
- 322. [Lab] Manually Assign License to the Users
- 323. Auto License Assignment
- 324. Organization Based License Assignment
- 325. Policies and Features
- 326. Enabling External Domain Messaging
- 327. [Lab] Workspaces
- 328. [Lab] Register Cisco DX70 in Cloud
- 329. [Lab] Register Cisco IP Phone to Webex Cloud with MPP conversion
- 330. Webex Calling Architecture
- 331. Webex Calling and PSTN Access Methods
- 332. Webex Dial plan
- 333. Trunks
- 334. Route Groups
- 335. Rerouting Mechanisms
- 336. Enable location for Webex Calling powered by broadcloudpbx
- 337. Connecting PSTN to a Site
- 338. Ordering DID Number from PSTN
- 339. Enabling Webex Calling powered by broadcloudpbx for Workspace
- 340. Enabling Webex Calling powered by broadcloudpbx for User
- 341. Local Gateway Registration Process
- 342. [Lab] Deploy vCUBE Router (Cisco C8000V) in Azure
- 343. [Lab] License Configuration for vCUBE
- 344. [Lab] Integrate vCUBE for Webex Calling and PSTN Interconnect
- 345. [Lab] Add Location in Webex Control Hub
- 346. [Lab] Configure Trunk in Webex Control Hub
- 347. [Lab] Configure Route Group in Webex Control Hub
- 348. [Lab] Create Dial Plan in Webex Control Hub
- 349. [Lab] Configure vCUBE for Webex
- 350. [Lab] Configure vCUBE for PSTN
- 351. [Lab] Set the PSTN Connection for Location
- 352. [Lab] Assign PSTN DID Number to Webex User & Test Calls
